GIVE YOURSELF THE THRILL OF YOUR LIFE!

Mr. Car Owner:

How would you like to have the driving thrill of your life next weekend?

Picture this yourself! Next weekend you go down to your car--the new one or the same exact car that you've been driving for years. You've made only one simple change to that car, so easy that your 16-year old son could do it. But now, when you turn on the ignition, a modern miracle of engineering science comes to life under your hood!

INSTANTLY you'll see and feel the difference in that engine. That engine will hum with new throbbing power!

We ask you to pull up to another car at the stoplight, a car of approximately the same year and make as your own. Wait until the light changes from red to green. Let the other car start first. Wait till the other car gets half-way across the street. Then slam your foot down on the gas pedal!

Before that other car has even crossed the street, you will have caught up with him. And then you will flash away from him ... you will leave him a full block behind.

Yes, you can do all this when you install the "MINI-SUPERCHARGER", the amazing Power Booster that gives you up to 15 MORE HORSEPOWER from your engine! And it gives you the gas economy you've dreamed about for years! Here's why:

> This Power Booster is patterned after superchargers selling for as high as $600. Its whirlwind propeller breaks up the raw, unburnt gas that your engine is wasting today ... gives you blazing new power from every drop! Its emergency breather valve draws huge quantities of fresh, clean air into your engine ... forces that engine to breathe deeper ... push harder ... pile up more mileage from every gallon you buy!

Now -- by harnessing the raw, unburnt gasoline that your engine is now wasting, the amazing MINI-SUPERCHARGER can actually boost your car's horsepower, acceleration, gas mileage and engine life.

Prove it to yourself! Test the famous MINI-SUPERCHARGER in your own car for 30 days at our risk. If for any reason you're not 100% satisfied with the increase in mileage and performance -- return the MINI-SUPERCHARGER for a FULL REFUND. You have nothing to lose ... mail the FREE TRIAL Order Blank now!

Very truly yours,

Tom Fairchild

J. C. Whitney & Company

READ THE COMPLETE AMAZING STORY AND GUARANTEE . . . . . SEE INSIDE

NOW! Turn Your Waste Gas Into

GET UP TO *15 MORE* HORSEPOWER – *6 MOR*

Almost unbelievable— BUT TRUE!

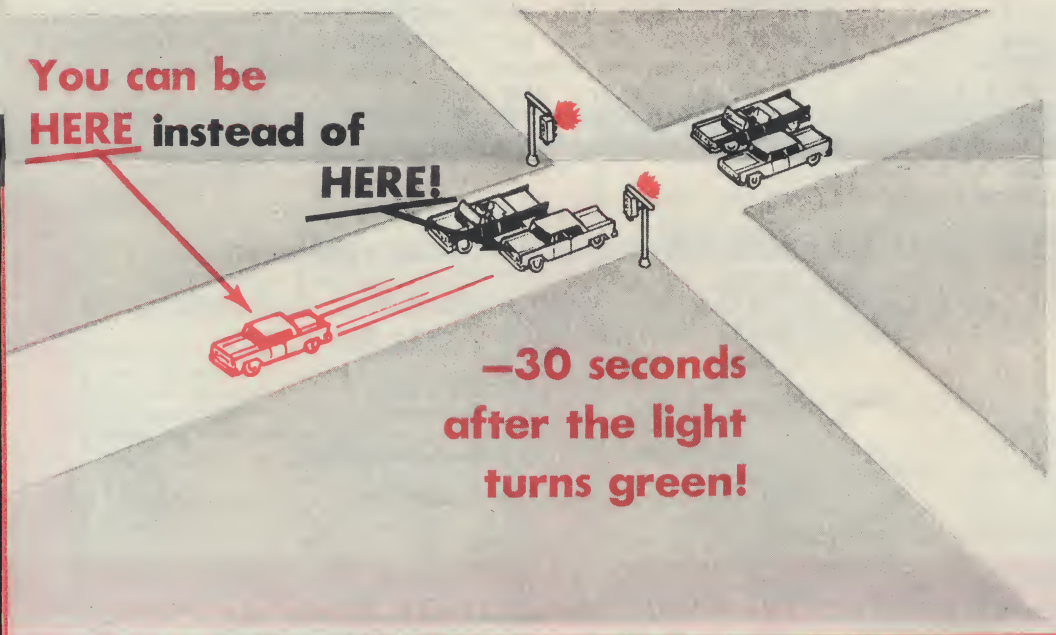
TRY THE MINI-SUPERCHARGER FOR 30 DAYS AT OUR RISK

In just a matter of minutes you can transform your car into a purring, power-packed greyhound that literally leaps ahead when you touch the accelerator. AND YOU GET ALL THIS AMAZING EXTRA POWER BY USING LESS GAS!

For Dramatic Proof Make This Power Test at Any Stop Light

With your new MINI-SUPERCHARGER installed, pull up alongside another car of about the same age and class. When the light turns green, hit the accelerator! Watch the other fellow's look of astonishment (through your rear view mirror) as you shoot ahead. In seconds he's "miles" behind!

Then take your car out where there are a few hills. Just before you begin your climb, slam your gas pedal to the floor and hang on to the wheel! But be sure to slow down as you reach the top of the hill, or you'll feel as though you're taking off on a ski jump!



Every auto wastes gas, regardless of the make and model. In many cases, the waste is so great that people are paying up to one third *more* to drive their cars than they should. And when you waste gas, you waste *power!*

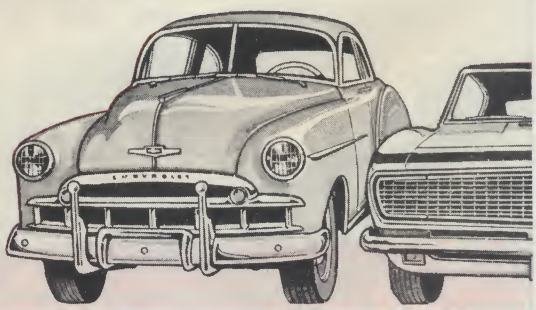
To overcome this waste, automotive engineers invented the supercharger, an expensive, intricate device that usually costs hundreds of dollars to install. Yes, the cost was hundreds of dollars until the MINI-SUPERCHARGER was invented!

The Gas You Save is The Reason Why You Get All That Extra Power!

Mini Supercharger is so *ingeniously designed,* so *basically new* that it has been granted U. S. Patent No. 2,409,937. Works like a miracle . . . increases fresh air intake *automatically* as engine turns over faster . . . prevents wasteful fuel, air-poor mixture . . . actually cuts gas consumption while increasing horsepower. Mini-Supercharger gives you the thrill of SOARING POWER because it steps up *gas moleculization* and *delivers correct, PRE-ENGINEERED gas-air mixture for every driving condition,* winter or summer.

With Mini-Supercharger you get breath-taking acceleration—instant throttle response —"jet assisted" starts—blazing new power that will make your friends gasp with astonishment, simply by *harnessing the raw, unburned gasoline that your engine is wasting today.*

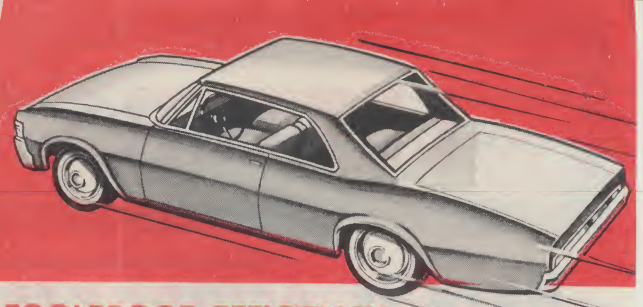
Works Like Magic On C



INSTALL THE MINI-SUPERCHARGER Y

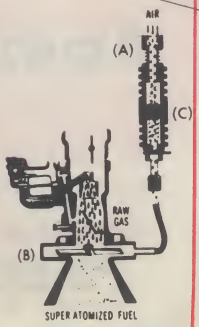
SUPER-POWER!

E MILES PER GALLON!



A MIRACLE OF FOOLPROOF EFFICIENCY

Mini-Supercharger is precision engineered from pure aluminum and zinc-plated open hearth steel—and is so ruggedly constructed as to be virtually indestructible. The Proportioning Breather Valve (A) automatically feeds a "pre - programmed" charge of fresh air into the carburetor to correct over-rich mixtures — makes engine BREATHE DEEPER and PUSH HARDER. Powerful, blower - type impellers of high temperature glass and DUPONT TEFLON (B) power-blend the correct gas-air mix, *giving it up to twice the natural explosive power.* You squeeze the *unused power* out of every drop of fuel—get MORE MILEAGE, HIGHER HORSEPOWER, BETTER PERFORMANCE—no matter what the age or condition of your car. *Thermostatic "brain" (C) adapts function to prevailing temperature.* As underhood temperature increases and air gets thinner, extra oxygen-laden air is pulled in to intensify combustion.



Save $25, $50, $75 or More a Year on Gas!

When you install Mini-Supercharger (a job that takes less than 30 minutes) you're in for the THRILL OF A LIFETIME. From the first moment, you'll feel the difference in an engine that *hums with new, throbbing power.* You'll roll along with your foot hardly touching the pedal. On the highway, you'll flash away from other cars—spurt up the steepest hills—actually *pass other cars in 2, 4, 5 and even 6 seconds less* than you could have done before.

In distance driving, you'll quickly notice the enormous gas savings Mini-Supercharger gives you at high speeds! At 50 . . . 60 . . . even 70 MPH, *your foot is still part-way up on the gas pedal . . .* YOU STILL HAVE ALL THE RESERVE POWER TO GET OUT OF AN EMERGENCY!

In stop-and-go city driving you get the acceleration to shoot out in front of the crowd . . . suddenly other cars will seem like slowpokes to you. And you're doing all this with far less gas than you're using today. Dozens of Dyno tests, backed by over 1,000,000 miles of highway driving, *prove* the efficiency of Mini-Supercharger!

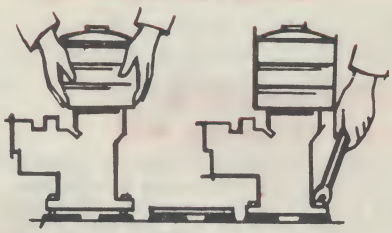
You'll Think You're Driving a Different Car!

Mini-Supercharger gives you many additional advantages: no oil dilution through unburned gas—better lubrication and longer engine life—less carbon deposit—fewer valve troubles and engine repairs—no wet fuel adhering to manifold walls—reduced danger of "vapor lock"—*full power without laboring and "ping."* Drive up a long, steep, winding hill . . . the difference will amaze you!

Try The Mini-Supercharger Entirely at Our Risk

Mail the enclosed 30-DAY NO RISK ORDER FORM today. Your money back if not delighted, under our written guarantee. No matter what kind of a car you drive, here's your chance to turn it into a real "get away car" at a cost that is less than you'd pay to take the family out to dinner.

SO EASY TO INSTALL THAT EVEN YOUR 16-YEAR-OLD SON CAN DO IT!

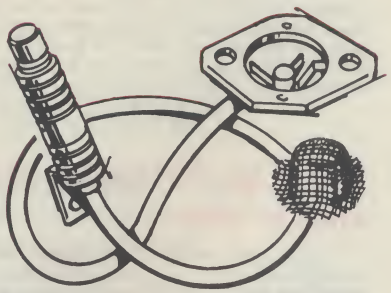


Step 1. Open your hood. Locate Air Cleaner and Carburetor Unit that sits smack on top of your engine. *Simply take an ordinary* wrench and loosen the two or three bolts that hold carburetor to the engine!

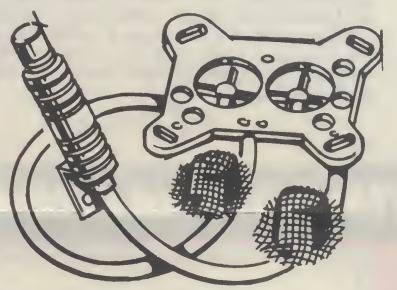
Step 2. Lift up the carburetor. Put MINI-SUPERCHARGER unit in place. *What could be easier?*

Step 3. Replace carburetor. *Now turn on your engine! And then get in and take the most thrilling drive of your life!*

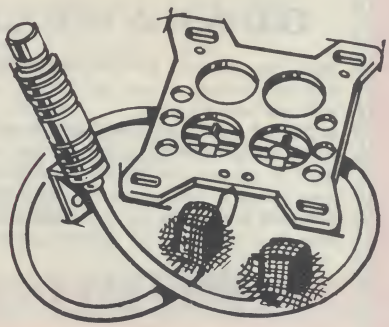
There's a Mini-Supercharger to Fit Every Car!



68040—For Single Throat Carburetor

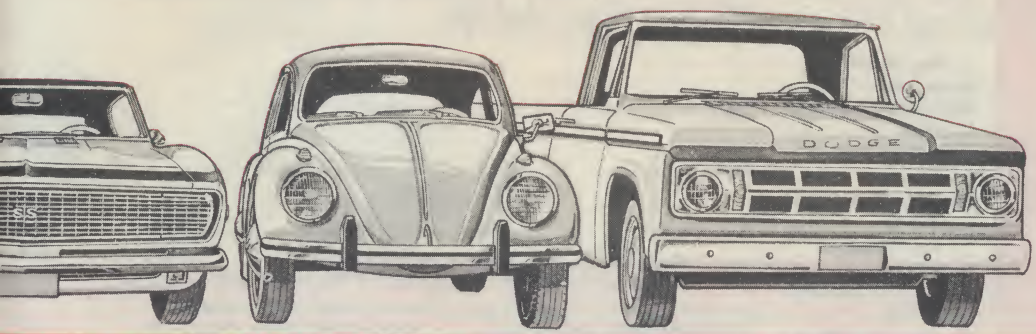


68041—For Dual Throat Carburetor



68043—For Four Throat Carburetor

old Cars, New Cars, Foreign Cars-Most Trucks!



OURSELF IN 30 MINUTES

ANYBODY CAN DO IT

LETTERS OF THANKS!

Here is Actual Proof of the Mini-Supercharger's Amazing Performance from America's Motorists

He put a Mini-Supercharger on his wife's 1957 Buick with the following astonishing result:

"Being somewhat of an automotive buff, and enjoying tinkering with cars, I had the opportunity of installing a Mini-Supercharger on my wife's 1957 Buick. This car, which is used as a second car in the family for her to do her shopping in, has always been somewhat sluggish and gave very little in the way of good gas mileage. After installing the Mini-Supercharger on this car, I experienced a big increase in gas mileage, from 14 to 20 miles per gallon. It is quite obvious that I have already saved three times the price I paid for your wonderful Mini-Supercharger.

This old car has never had such pep and power. I found the installation so simple, that even my thirteen-year-old son could tackle this job by himself with no problem. It took me less than thirty minutes to complete the installation."

I. J. F.
Oak Park, Michigan

Thrilled new 1967 Cadillac owner writes as follows:

"I have just finished spending three weeks carefully checking my car's performance after installing your new Mini-Supercharger on my 1967 Cadillac. Not only has my gas mileage increased 20%, but the increased acceleration on freeways is really thrilling.

I also pulled a two-wheel trailer on a camping trip last week and the performance after having the Supercharger installed has been quite an improvement."

L. B. S.
Encino, California

Auto Service Manager couldn't believe our claims, so he checked us out, with the following result:

"Installation was exceptionally easy – less than 25 minutes. Immediate results show a definite increase of eleven horsepower on the Dynamometer – and the increase in mileage was easily up to 5 miles more per gallon."

V. L.
Orlando, Florida

Now averaging 22 miles per gallon on her 1954 Ford V8

"I must tell you about the wonderful results your Mini-Supercharger has given my 1954 Ford V8. On a recent trip to Canada I averaged an easy 22 miles per gallon, going and coming, and the new power was really thrilling!"

Mrs. J. E.
Bronx, New York

Gets better acceleration than when his car was new!

"I recently installed your Mini-Supercharger on my 1967 Chrysler. I want you to know how pleased I am with it. My acceleration is much better now than when the car was new! More important, is that I have already noticed a great gain in my gasoline mileage per gallon."

H. W.
Brooklyn, New York

Boosts mileage five miles per gallon on his old Chrysler

"I have a 1951 Chrysler Windsor. Before installation of your Mini-Supercharger, I got approximately 15 miles per gallon. Since installing the Supercharger, I get as much as 20 miles per gallon."

A. E. M.
Brooklyn, New York

Would not take $50 for his Mini-Supercharger

"I received two Mini-Superchargers for my Buick and Chevrolet. Am well pleased with them. It made a difference on the Buick Roadmaster from 14 to 20 miles a gallon. Would not take fifty dollars for them."

O. J. B.
Yellowstone Park, Wyoming

Long trip through mountains averaged 19 miles per gallon

"I must tell you how pleased I am with the wonderful results I am getting after installing your great Mini-Supercharger.

I recently completed a trip to Pittsburgh and my Chevrolet averaged 19 miles per gallon . . . I also noticed that passing cars on the turnpike was actually exciting! I don't ever remember my car performing as well."

C. H.
New Hyde Park, New York
